

Ansible Lab Setup

In this training we will be running 3 or 4 Linux headless VMs using vagrant. Hence we require the below set up

OS

Windows 7 and above (avoid windows 10 if possible)

RAM

6GB and above

Virtualization

VT-x Enabled

Arch

64 Bit

Softwares

1. Oracle Virtual Box: Install latest from <https://www.virtualbox.org/>
2. Vagrant from hashicorp: Install latest from <https://www.vagrantup.com/downloads.html>

Permissions

1. USB file transfer enabled: I will bring VM files in a USB and use that to share with the participants
2. Internet access: We will be accessing the internet for a lot of things throughout the sessions (For Eg. Installation of packages)
3. github access: Access to www.github.com
4. VM on Windows 10: Please turn off Hyper-V
